IMGVISION is proud to release the new IDVR1204 4 CH MPEG-4 real time Networkable Digital Video Recorder. It includes features such as MPEG-4 compression format, superior real time performance with 120 IPS (NTSC) / 100 IPS (PAL), longer recording time via independent disk array, USB backup function, remote surveillance on cell phone, advance motion trigger recording, and multiplex functions. All the benefits of this product are created to secure your life every time and everywhere.

The IDVR1204 is a Networkable Digital Video Recorder specially designed for CCTV Surveillance Applications. The IDVR1204 supports four CCD Cameras to be connected in to one DVR and could simultaneously be viewed in a single Monitor. The DVR1204 is an integrated digital video recorder, multiplexer and video server in to one unit.

The IDVR1204 is a Peltaplex DVR. This Multiplex operation enables users to simultaneously view live and previously recorded video while continuing to record at the same time either local or remote viewing via network.
